Summary

Strategic Chief Technology & AI Officer with 25+ years of experience defining and implementing scalable, AI-driven technology architecture. Expert in transitioning global organizations to an Agentic Operating Model while owning AI Strategy and Data Architecture to ensure a single source of truth across diverse business units. Proven leader in Platform Standardization and Technology Budget Management, driving digital transformation that eliminates technical debt and maximizes operational leverage.

Work Experience

Head of Global Enterprise Architecture and Operations Technology

February 2024 – Present

THE LYCRA COMPANY, WEST CHESTER, PA

- Own the worldwide Operations Technology organization, defining a global System Architecture that integrates Enterprise Architecture, Applications, and Infrastructure across manufacturing sites.
- Architect and implement an Agentic Operating Model leveraging AI agents, RAG applications, and MCP integration frameworks to automate complex business processes and ensure scalable growth.
- Define multi-cloud AI Strategy using AWS and Azure, implementing Infrastructure-as-Code and CI/CD pipelines to establish a single source of truth for global operational data.
- Redesign modern application development through API-first architectures and scalable Data Architecture to support real-time decision-making and platform standardization.
- Implement repeatable delivery frameworks to eliminate legacy technical debt, improving Vendor Management and optimizing technology investment priorities.

Faculty Instructor

January 1999 – Present

UNIVERSITY OF BUFFALO, BUFFALO, NY

- Define and deliver curriculum for Data Architecture, NoSQL, and System Architecture, mentoring future engineers on cloud-native development and serverless frameworks.

Founder

June 2022 – February 2024

PRIME CONSULTING, WEST CHESTER, PA

- Own the creation of Technical Pre-Sales organizations for SaaS startups, implementing Platform Standardization to accelerate market expansion and client results.
- Architect product strategy and design patterns for large enterprises, focusing on Acquisition Integration and sustainable technology scaling.
- Implement Technology Budget Management strategies for clients, guiding cloud migration and CI/CD adoption to maximize ROI and operational efficiency.

Head of Customer Success & Sales Engineering

January 2021 – June 2022

OPENLEGACY INC., REMOTE

- Architected the pre-sales engineering organization to evangelize a SaaS platform capable of legacy system integration and Acquisition Integration support.

- Redesign customer engagement models for Fortune 500 clients, ensuring Data Security Governance and cross-platform technical alignment.
- Managed joint partner engagements with IBM and Redhat to define industry-standard API integration and multi-cloud strategies.

Vice President, Sales Engineering and Customer Success

January 2019 – April 2020

FREEDOMPAY, PHILADELPHIA, PA

- Owned the execution of strategic programs for enterprise customers, driving \$100M in revenue through robust System Architecture and client leverage.
- Implemented a global payments and loyalty rewards architecture across 4,000 locations, prioritizing Data Security Governance and high-volume scalability.

Executive Director, Industry Solutions and Strategic Engagements

May 2014 – January 2019

ORACLE USA, REMOTE

- Directed Technology Budget Management for strategic accounts, generating \$1.1B in revenue by aligning software solutions with enterprise-scale business goals.
- Architected transformational solutions leveraging PaaS and IaaS to drive Platform Standardization across Big Data and IoT environments.

Director of Engineering

August 1999 – July 2005

GARTNER GROUP, REMOTE

- Redesign the research supply chain from manual workflows to a digital, cloud-native vehicle, establishing a single source of truth for global research assets.
- Owned the full lifecycle design and Vendor Management of a J2EE application portfolio covering global payments and fulfillment.

Education

Bachelor of Science in Management Information Systems

PENNSYLVANIA STATE UNIVERSITY, STATE COLLEGE, PA

Additional Skills

AI & Architecture: AI Strategy, System Architecture, Agentic Operating Model, Data Architecture, Platform Standardization, RAG Applications, Vector Databases, Model Context Protocol (MCP)

Leadership & Governance: Technology Budget Management, Data Security Governance, Vendor Management, Acquisition Integration, Digital Transformation, Strategic Sales Leadership

Cloud & Engineering: Multi-Cloud Architecture (AWS/Azure/GCP), DevOps, CI/CD Pipelines, Infrastructure as Code (IaC), Microservices, API Integration, Next.js/React, Node.js

Certifications

- Model Context Protocol (MCP) - Anthropic Integration Framework (October 2025)
- OpenAI API - AI Agents - OpenAI (October 2025)
- RAG Applications with Vector Databases - DeepLearning.AI (October 2025)
- Project Management Professional - PMI (March 2004)

Awards & Recognition

- Solution Execution of the Year - June 2011
- Middleware Architect of the Year - June 2010

Professional Affiliations

- GLG Council Member
- GuidePoint Advisors - Technical Advisor
- Advisory Cloud - Board Member and Technical Advisor
